WALU POOL

All-season safety covers

EVOLUTION Model

WALU POOL replaces all the following :

- Solar bubble cover
- Reel system for solar bubble cover
- Winter cover
- All other safety systems (fences, shelters, immersion detectors ... etc)

EVOLUTION
aluminium profile fitted on surface, with its ends resting on pool coping stones

WALU POOL: Safety has been our priority for more than 16 years!

Half-round anodised aluminium supporting bars, modular panels made of reinforced flexible composite material of 650gr/sq.m with anti-abrasion treatment and attaching system: **WALU POOL** covers are designed to provide optimal safety:

- **EVOLUTION Model** for all pool shapes* up to 11 x 5 m,
- **STARLIGHT Model** for all rectangular pools* (with or without steps) up to 11 x 5.50 m.

* As per pool drawing provided

Compliance with French safety standard NF P 90-308
(tested by official test laboratory, Laboratoire National d'Essais)

Fitting the crank

Weighing 1.250 kg per sq. meter, **WALU POOL** can be rolled up in 2 or 3 minutes by just one person using a geared-down manual crank (or two people using two cranks for pools of at least 50 sq. m) or a motorised crank.

WALU POOL: The only swimming pool cover with interchangeable bars and panels !

Exclusive patented **WALTER** system: The cover's panels and anodised aluminium tubes are interchangeable and can be replaced at less cost and individually on site, if necessary.

This advantage means you never have to be without your pool safety system and ensures your cover always looks attractive.

WALU POOL: Protection and cleanliness through summer and winter!

Its concept and, particularly, the efficient sealing around its edges ensure your swimming pool remains clean through summer and winter.

> Colours

Translucent blue

Translucent white

* According to our general warranty terms delivered with the cover.

STARLIGHT Model

STARLIGHT
Even simpler and easier to handle, and a classy attractive look

WALU POOL: For use all year round!

Special features: **WALU POOL** is available in two versions:

- **Opaque:** Shuts out light thus slowing down the growth of algae and pathogenic micro-organisms and reducing considerably the use of chemicals.
- **Solar translucent:** During the day, it captures solar energy to keep your pool heated throughout the summer, which represents an appreciable energy saving.

Both the **Opaque** and **Solar translucent** versions of **WALU POOL** create an insulating air blanket which helps avoid heat losses during the night, ensuring longer use of your pool.

WALU POOL: Small storage space needed!

When it is rolled up at one end of the pool, the **WALU POOL** cover takes up very little space.

• 2 types of edge attachment fitting.

For safety : straps and stainless steel fasteners along widths (simple and quick).

For bad weather : Cabiclic cords along lengths (ideal for winter)

STARLIGHT aluminium profile fitted on underside, with its flat ends resting on coping stones

Opaque emerald

Opaque sand

The **WALU POOL** cover can be quickly unrolled by just one person, using its return strap, and can be moved back to the safety position in less than 3 minutes.

WALU MATIC and WALU MOVE

Winder systems

**EVEN
EASIER**

WALU MATIC: MOTORISED CRANK with 24-volt battery

With **WALU MATIC**, rolling up your **WALU POOL** safety cover is even easier and quicker.

WALU MATIC: Easy handling!

You can uncover your swimming pool effortlessly and in less than one minute. Unrolling is performed simply by means of the central pulling strap. A very high efficiency perforator coupled with a powerful back-gear motor provides a better solution than geared-down manual cranks.

WALU MATIC: Your safety above all!

WALU MATIC is equipped with a high performance 24-volt nickel-cadmium battery for your safety. Its quick charger completely recharges the battery in less than 20 minutes.

WALU MATIC: Smart design!

The cleverly designed lateral holding handle and the antifriction wheel are reversible so you can choose the side where you want the cover to be rolled up, to suit your layout or personal preference. The **WALU MATIC** motorised crank can be fitted to all existing **WALU POOL** covers*.

* Maximum pool size: 11,00 x 5,00 m.

WALU MOVE: Manual or motorised winder mechanism

With **WALU MOVE**, rolling up your **WALU POOL** safety cover is even easier and quicker.

WALU MOVE: simplified manual use!

WALU MOVE* is an ingenious system consisting of two trolleys placed at both end of the roller tube, one of which is fitted with a crank. As the cover is lifted slightly above ground level, rolling it up and unwinding it are easier and take less effort.

WALU MOVE: simple, clever design!

WALU MOVE is simply designed: body in sand-coloured synthetic material to blend in perfectly, wide rubber casters that roll better on poolside slabs and a removable hand crank.

WALU MOVE: Increase the service life of your pool cover!

WALU MOVE lifts the cover so that it does not touch the coping while it is being rolled up or unrolled. This limits the wear on the cover from the coping, all the more so if the latter is itself worn or abrasive.

MOTORISATION OPTION:

WALU MOVE can easily be motorised by adding an independent motor unit (bought with the **WALU MOVE** or added later). Your **WALU POOL** cover can then be rolled up and unrolled completely effortlessly. To unroll, simply pull out the cover using the pulling strap.

* For rectangular pools up to: 11.00 x 5.00 m, without steps on the long side (with or without motor).
